University of Cyril and Methodius
Bachelor's degree, faculty of Dentistry
Macedonia

Sep 2010 – Jun 2014
Skopje, N.

PROJECTS

Automated UI E2E Scripts using Selenium WebDriver

In this project I used **automationpractice.com** which is a public website made for testing purposes. I automated some of its main flows, testing the system functionality as well. The project is still ongoing, as I'm adding more scenarios and I'm organizing the code to follow code conventions. The GitHub link to my project is - <https://github.com/stojanovtrajche/UIAutomationPractice>
